

ADM-SRM: Performance of the Pilot and the Aircraft

Loss of Control(LOC) issues: an overview of CRM principles for the single pilot aircraft - ADM, SRM and Human Factors. Communication fundamentals, Situational Awareness, along with the danger of ignoring fatigue and its partner stress will be discussed as facets of risk management, automation management, task management, and our own human factors. Maintaining vigilance and awareness in general are vital to reducing the risk of aerial flight

Directions: Directions: Enter airport grounds, through the security gate then head northwest to Hanger 49. Call for security code if you need to.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
